

# UNG Stormwater Modeling

This project is sponsored by IESA.

One full-time student is wanted for this project. The student will conduct hydrology study for the campus, create input files for the EPA SWMM hydraulics model, help the Principal Investigator run the model and analyze the results. S/he is expected to have basic understandings of watershed analysis & hydrology, ArcGIS Desktop/Pro, spatial data digitization, geoprocessing tools, and ModelBuilder. Experience with EPA SWMM is a plus, but not required. The job is posted on the [HireTouch](#) and open until 10/1/2019. Qualified students are welcome to contact me and apply for it.
